

Summary

Cloud-focused software engineer with 7+ years of professional development experience building and improving production web applications. Hands-on with AI, AWS, Terraform, serverless architecture, and CI/CD through public projects including the Cloud Resume Challenge and Lambda-based applications. Strong background in API integration, performance optimization, and shipping customer-facing products, with a growing focus on cloud infrastructure, automation, and cost-efficient systems.

Technical Skills

Cloud Infrastructure: AWS, Terraform, Kubernetes, Docker

CI/CD: Github Actions

Scripting/Web: JavaScript, HTML, CSS, Vue.js, jQuery, Python, Bash

Tools: Git, Linux, Claude Code

Experience

iHerb

Developer II | Nov 2017 – Present

- Delivered scalable web features serving thousands of users, integrating with APIs and optimizing performance.
- Implemented A/B testing and data-driven improvements that improved conversion rates and reduced bounce rates.
- Refactored codebases and streamlined deployment processes that reduced rollout times.
- Built experience operating in production environments where performance, reliability, and rollout speed directly affected business outcomes.

Projects

- Cloud Resume Challenge (AWS) – Built a serverless resume site using S3, CloudFront, Route 53, Lambda, DynamoDB, and API Gateway; implemented CI/CD with GitHub Actions.
- Two Point Oh – Built an end-to-end AWS application using Python, Lambda, API Gateway, Amplify, DynamoDB, and IAM.
- Cloudy Calculator (Chrome Extension) – Developed and released a Chrome extension with hundreds of active users.

Education

Bachelor of Science, University of Central Florida

Certifications

- AWS Certified Solutions Architect Associate
- HashiCorp Certified: Terraform Associate (003)
- Google Associate Cloud Engineer
- AWS Certified Cloud Practitioner
